In this chapter, you'll learn how to use flash lighting for portraits. You'll learn about the different types of flash units, how to control the light with modifiers, and how to create beautiful portraits with flash lighting.

Chapter 5: Composition and Posing

Lighting is important, but it's not the only factor that makes a great portrait. Composition and posing are also essential elements of portrait photography.

You'll learn about the different elements of composition, such as lines, shapes, and color, and how to use them to create visually appealing portraits. Chapter 6: Editing and Post-Processing

Once you've taken your portrait, you can further enhance it with editing and post-processing. You'll learn how to adjust the exposure, color, and contrast; how to remove blemishes and imperfections; and how to create special effects.
