In *Time Warped*, renowned physicist and science writer Dr. Richard A. Muller takes us on a mind-bending journey through the science of time perception. From the mind-boggling insights of Einstein's relativity to the latest discoveries in quantum physics, Muller unravels the secrets of how we experience and measure time.

Along the way, we'll explore:

- The strange and wonderful ways that our brains perceive time

- The mind-bending effects of time dilation and time travel
- The role of time in our consciousness and decision-making
- The latest scientific theories about the nature of time

Whether you're a science enthusiast, a philosopher, or simply someone who's ever wondered about the nature of time, *Time Warped* is an essential read. It's a book that will challenge your assumptions about time, expand your mind, and leave you with a newfound appreciation for one of the universe's greatest mysteries.

Praise for *Time Warped*:

““A fascinating and thought-provoking exploration of the science of time perception. Muller does an excellent job of making complex concepts accessible to the general reader.” - Kirkus Reviews”

““A must-read for anyone who's ever wondered about the nature of time. Muller's writing is clear, engaging, and full of fascinating insights.” - Science News”

““Time Warped is a groundbreaking book that will change the way we think about time. Muller's research is cutting-edge, and

his insights are profound." - Brian Greene, author of The Hidden Reality

Dr. Richard A. Muller is a University Professor of Physics at the University of California, Berkeley. He is the author of several books, including *The Instant Physicist* and *The Physics of Everyday Things*.
